Tech Disruptors: Redefining Strategies of Benefits Technology

Anshuman Acharaya

VP, Strategy
Evolution IQ

Abhishek Bakre

*Partner, Insurance Strategy and
Transformation*
IBM Consulting

Jillian Mondaca

*Corporate VP, Head of Life Product &
Strategy*
New York Life

Carolyn Pagel, Moderator

*Senior Product Owner Administration
Journey*
Unum

Carolyn Pagel, Senior Product Owner, Unum

Think outside the box...

Jillian Mondaca, New York Life

Lessons Learned

Document Processes from Day One

Unlike a purely human decision process, AI requires **clear, traceable documentation** for regulatory, operational, and improvement purposes.

Fail Fast, Learn Faster

AI adoption in insurance benefits from an **iterative, experimental mindset**. Unlike traditional projects that can span years before launch, AI initiatives thrive on rapid prototyping:

- **Run pilot projects** quickly to validate hypotheses.
- Accept that some models or approaches will fail and **treat those failures as data**.
- Create short feedback loops between business users, data scientists, and compliance teams to refine approaches early.

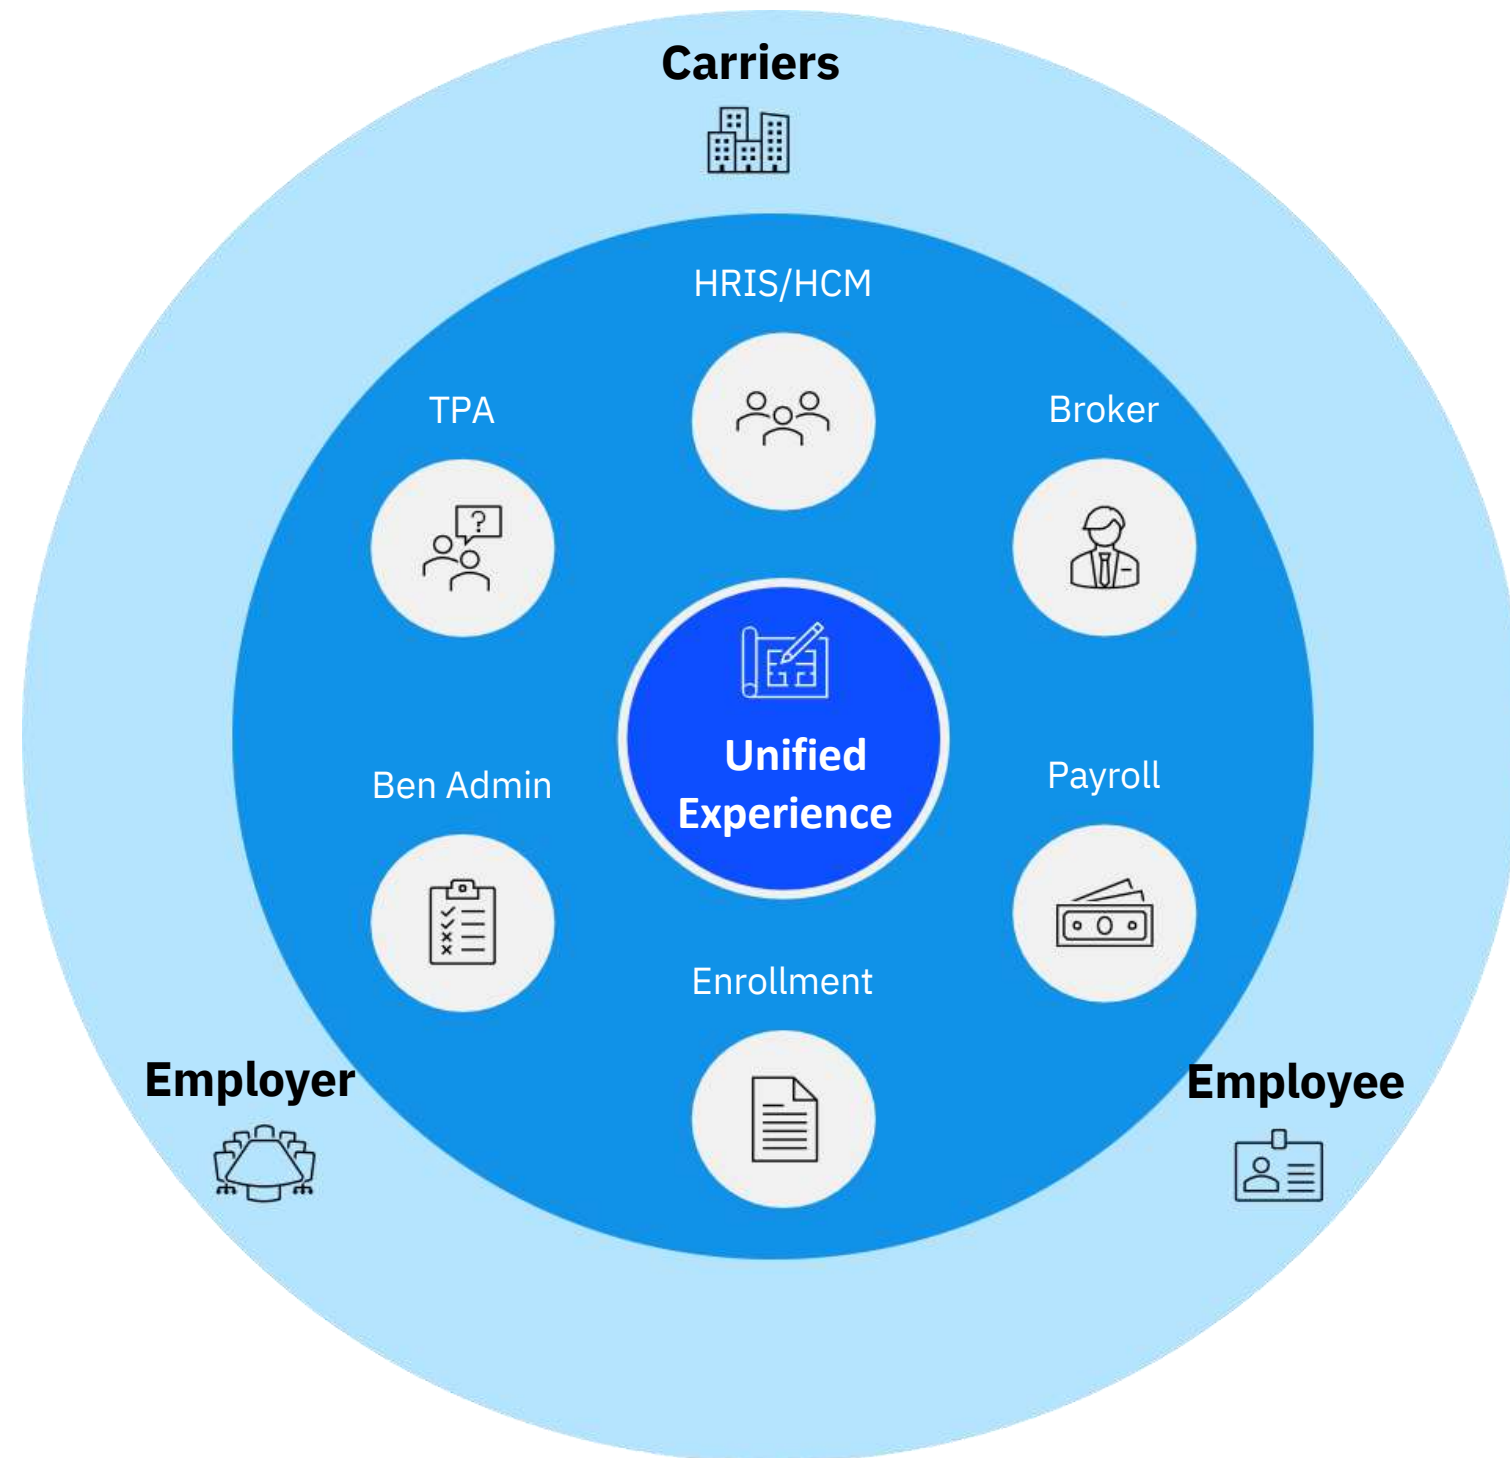

Abhishek Bakre, IBM

Lessons Learned

Success in large transformations is more than "time to go-live". Measure broker satisfaction, accuracy of data and information, and overall employer & employee engagement, and communicate periodically.

Beyond Deadlines: Disruption That Deliver

“Real disruption = engaged brokers, trusted AI, and connected ecosystems.”

Group Insurance Ecosystem

Beyond Go-Live: Transformation success is more than “time to go-live.” It’s about measuring broker satisfaction, accuracy of data and information, and overall employer and employee engagement, communicated consistently.

AI Adoption & Trust: True impact comes when AI is not only deployed but trusted & adopted, improving decision quality, reducing manual effort, & elevating experiences for BRs, ERs, and EEs alike.

Seamless Connectivity: Disruptive standards like the Model Context Protocol (MCP) are emerging as the universal “API for AI,” enabling seamless, scalable connectivity across benefits ecosystems.

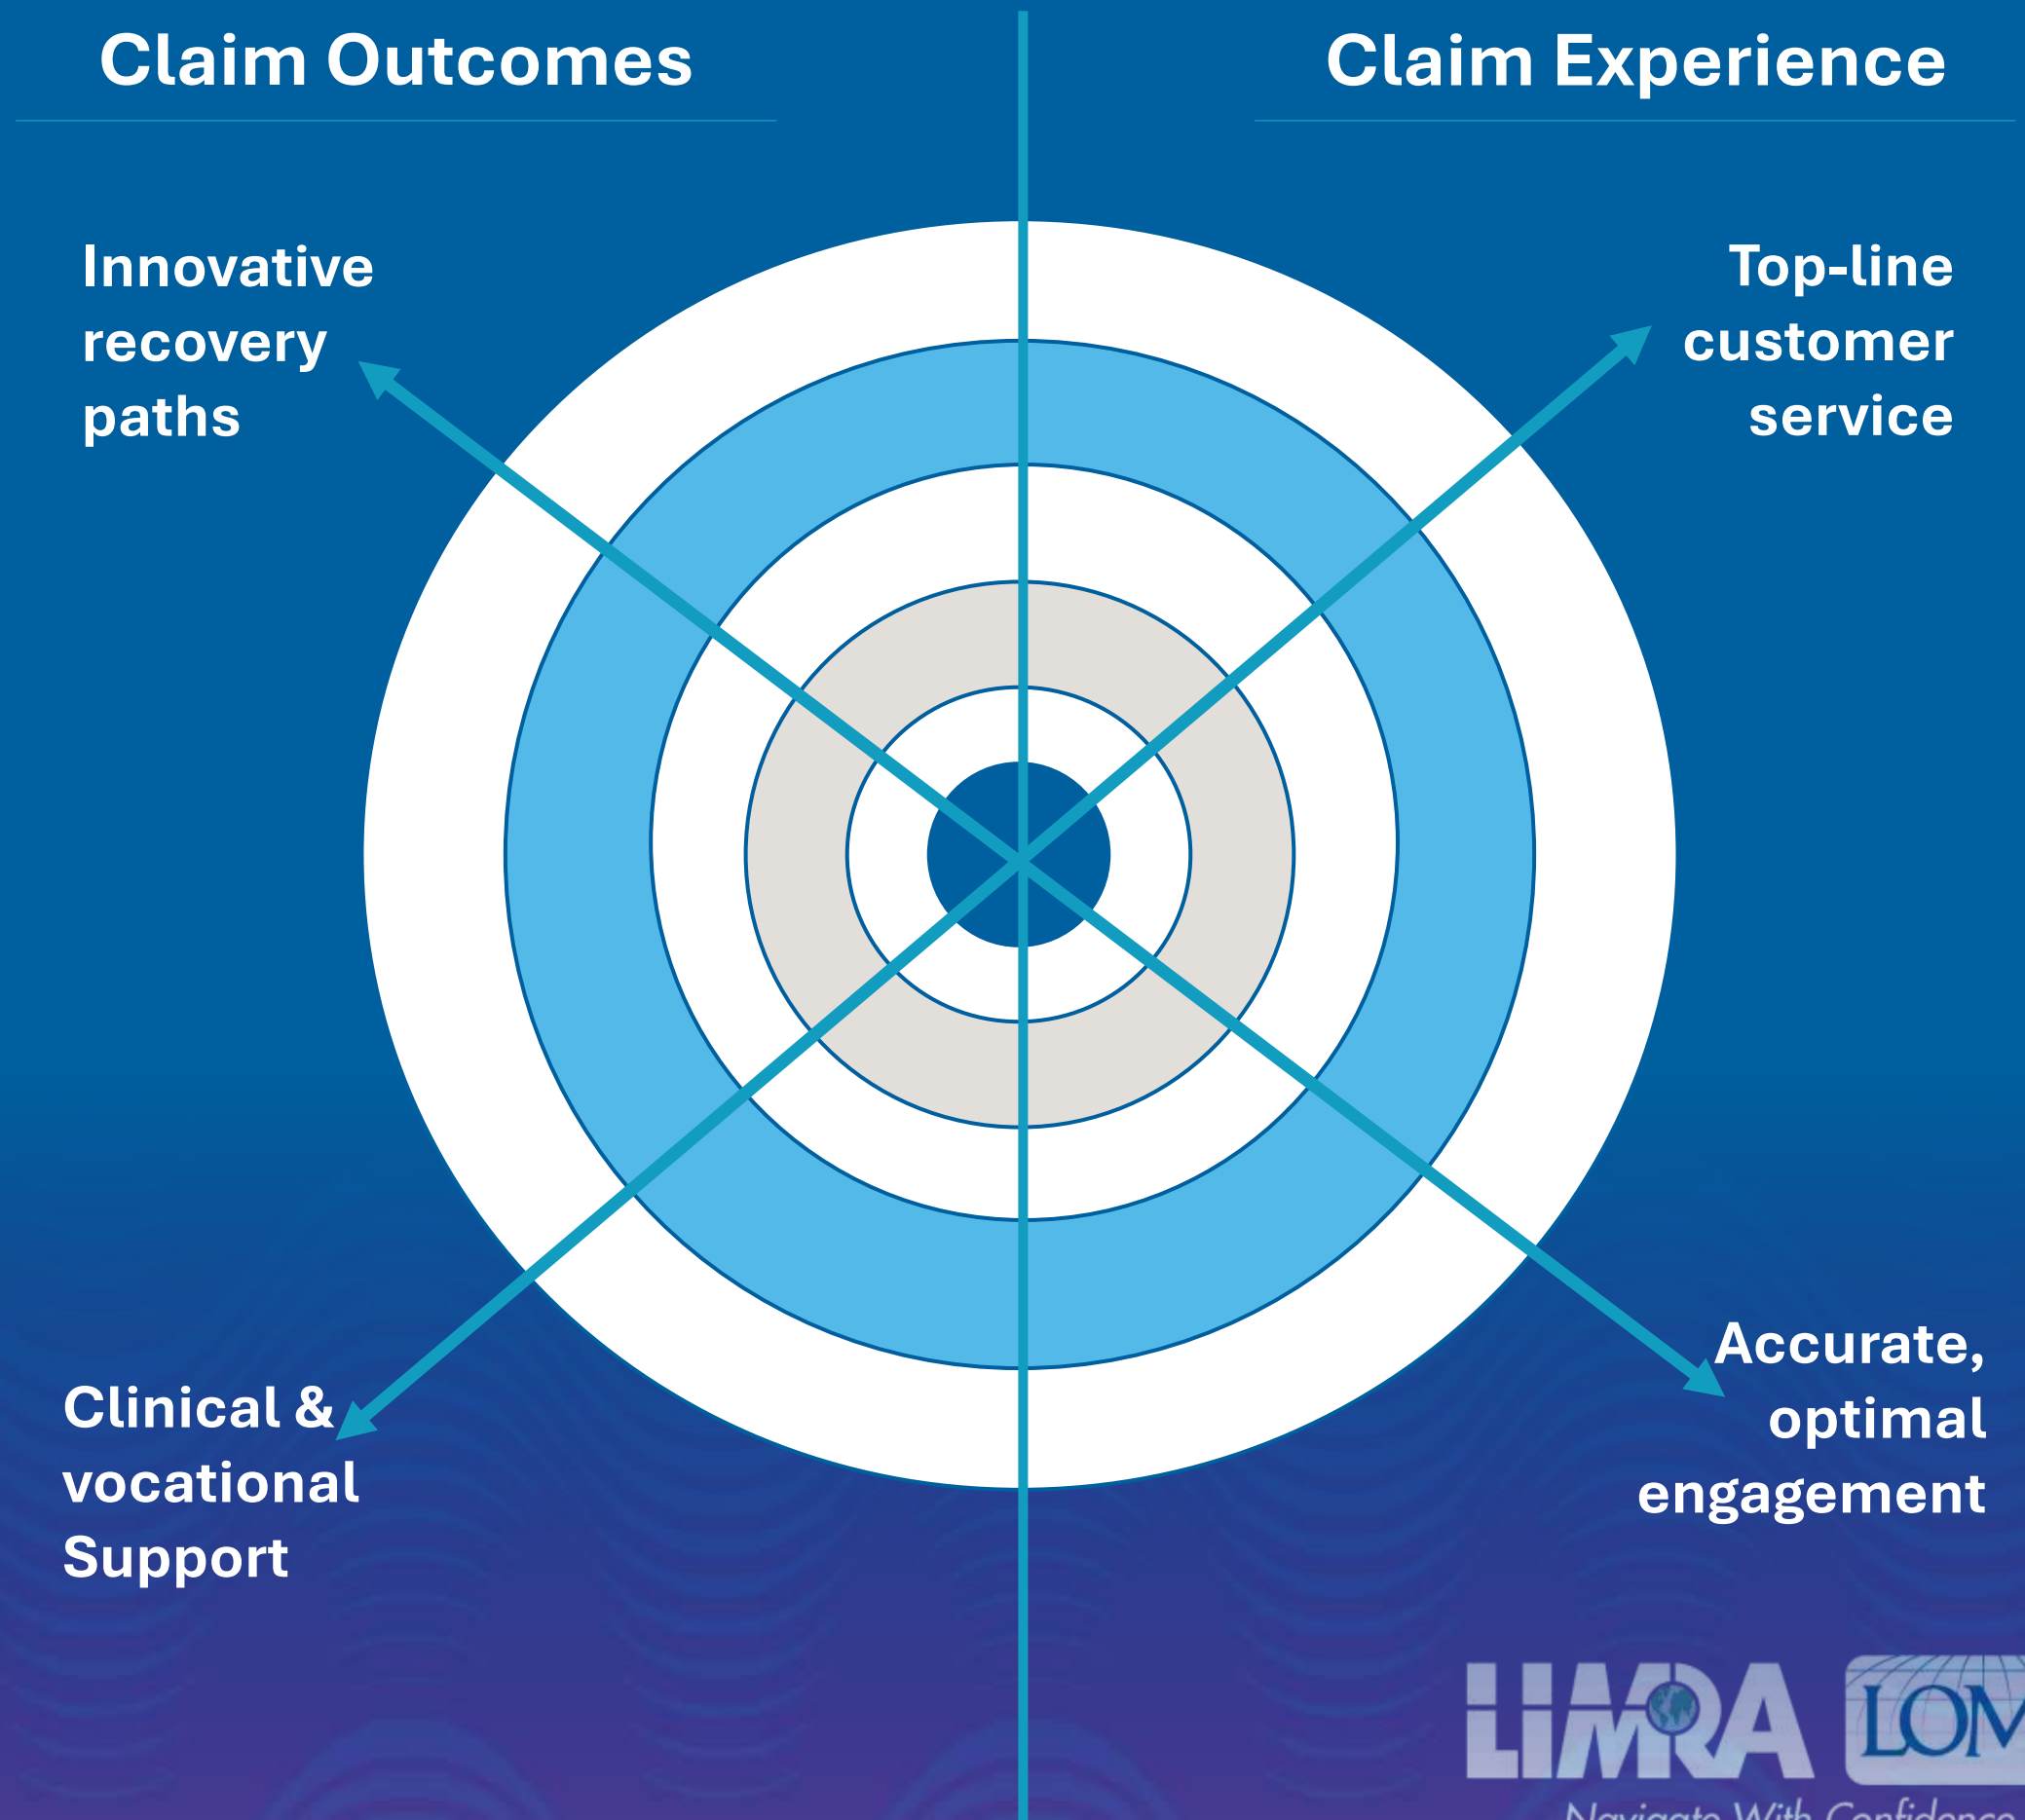

Anshuman Acharya, EvolutionIQ

Lessons Learned

- Carriers are shifting their AI strategy with the changing dynamics in the Employee Benefits ecosystem
- A deep dive into change management and frontline expectations is needed to drive real value
